MAC-S 28-70 HYDRO
The Mobile shredder

Bano is pleased to introduce the new MAC-S 28-70 HYDRO in its MOBILE version.

Hydraulic driven, this revolutionary slow-speed single-shaft shredder is suitable for the size reduction and calibration of a wide range of materials like : plastics, bulky urban and industrial wastes, electric cables, electronic appliances (WEEE), wood, etc.

Its exclusive characteristics : versatility, compact dimensions and mobility respond to the specific needs of the market and to the necessity of the user to move the system to different locations.

High performances with low energy requirements and low operating costs are guaranteed by the exclusive Bano cutting system and by the different rotor designs specific for every kind of application.

The Bano Mobile shredder will expand your business!
